About CFR Chemicals

*Better People.
Better Service.*

Founded in 1996, CFR Chemicals is a privately owned Western Canadian based company. Our primary focus is the distribution of chemicals to the energy and industrial manufacturing industries. We are also a niche market provider of specialty oil production chemicals.

We have a strong network of suppliers around the world. A highly skilled, knowledge-based management team serves our clients and customers with pride. Our unparalleled customer service is the reason CFR will become your first choice chemical supplier.

Key Partnerships

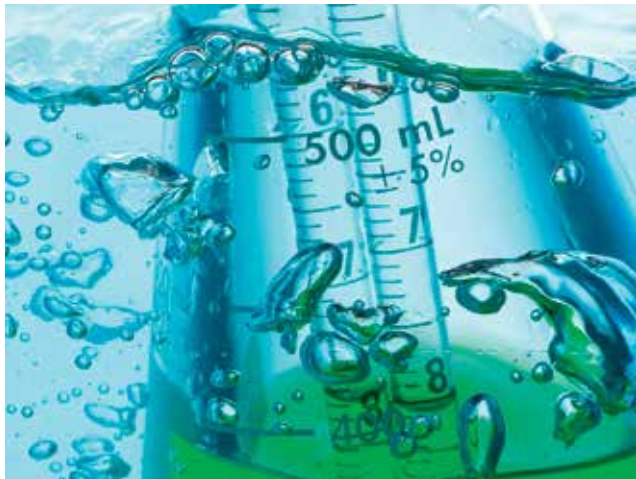

Natural Gas Processing Chemicals

*Better People.
Better Service.*

CFR supplies a complete line of commodity and specialty chemicals used in natural gas processing:

- Methanol
- Solvents
- StaCool™ Inhibited Heat Transfer Fluids
- Virgin Bulk Glycols
- Propylene Glycol/Potassium Acetate for Rental (Testing Fluids)
- Corrosion Inhibitors
- pH Buffers
- Super Hydrate Breaker™
- Generic Amines
- Acids

Providing a superior quality product, value-added technical service, and just-in-time delivery are all part of our normal offering.

StaCool™ Service Package

Routine sample analysis and technical support is provided to all StaCool™ customers to help maintain process units, extend product life, and decrease operating costs.

Technical and Safety Training

Training is available for individuals or groups. Employing chemists, certified technologists, and professional engineers ensures there is always a member of the CFR team to provide you with the information and training you need, when you need it most.

StaCool™

"CFR has been great to deal with and I would recommend them to anyone. If we need product right away, [our CFR sales rep] will either deliver it to us or make arrangements for pick up, day or night."

- Lead Operator

StaSweet™
H₂S Scavengers

StaSolv™
Wax & Paraffin

StaClean™
Industrial Cleaners
& Degreasers

StaZero™
H₂S & LEL Reducer

CFR is a niche provider of oil & gas production chemicals. We also offer contracted laboratory services and technical expertise from our laboratory in Edmonton, AB. Our line of production chemicals includes:

- StaSweet™ H₂S scavengers
- Scale Inhibitors
- StaSolv™ Paraffin Inhibitors
- Packer Fluids
- Demulsifiers/Emulsion Breakers
- Foamers & Anti-Foamers
- StaClean™ Degreasers
- StaZero™ LEL Reducer

For a complete list of our production chemicals, talk to a member of the CFR sales team or visit our webpage.

What makes CFRs products different?

Our patented, non-regulated, formaldehyde-free H₂S scavengers are unlike any other scavengers on the market today. Manufactured without formaldehyde, ammonia, or methanol – these products are safe to handle, low-odour, effective in multi-phase systems, and produce no hazardous byproducts. Spent material is easily and cost-effectively disposable, and can be handled safely with minimal personal protective equipment.

What makes our technical service different?

Our technical service staff and laboratory in Edmonton, AB are available to analyze, troubleshoot, and provide solutions for all types of oilfield production issues. Specialized testing equipment gives our team superior field sampling and testing capabilities.

These services are designed to complement your existing chemical programs.

What makes our customer service different?

At CFR, we customize the way we do business with each customer because no two are alike. What's important to you is important to us, and we'll find a way to work together to create a mutually beneficial partnership.

If you need a product right away, our sales team can deliver most rush orders within 24 hours. And by calling our 24 hour emergency order line, the CFR Kuusamo plant is available for product pick-up, 24 hours a day, 7 days a week, 365 days a year.

Our Focus on the Environment

*Better People.
Better Service.*

Looking to reduce your company's carbon footprint? In addition to our StaSweet™ products, CFR Chemicals represents a number of other environmentally friendly products, such as our BioGreen™ Heat Transfer Fluid. This product has an ultra low-toxicity and is made from a renewable resource - corn.

For more information on our complete line of environmentally friendly glycols, scavengers, degreasers, and other products, please contact a member of the CFR Chemicals Sales team or visit our website. Product data sheets and Material Safety Data Sheets are available online.

BioGreen™
StaCool™ Heat Transfer Fluid

More than just chemicals

*Better People.
Better Service.*

Bulk Fluid Rentals

Our bulk fluid rental program is an innovative alternative to purchasing fluids for short-term uses, such as blow-out preventer and pipeline pressure testing. Propylene Glycol and Potassium Acetate are environmentally friendly alternatives to methanol in many applications requiring freeze protection.

Bulk Storage & Trans-Loading Services

CFR provides bulk product storage and trans-loading services at our main plant located just outside Red Deer, AB. Storage tanks are also available for short or long term lease for a variety of fluid types, and our access to rail allows us to trans-load your product directly from railcars into tanks, trucks, or totes.

Our goal is to provide efficient, high quality, value added services to our clients, combined with the highest ethical, safety and environmental standards in our industry.

Transportation

CFR employs a variety of safe and reliable carriers to transport our products in Alberta, across the country, and internationally. Carriers endorsed by CFR are monitored to ensure they meet our strict safety standards.

Health & Safety

CFR Chemicals is committed to continuous improvement of our health and safety programs. We value the input of our employees, suppliers, and clients to help us achieve a safer working environment for all.

We are proud to be COR certified, and work with vendor management systems such as ISNetworld and Complyworks.
