

Clay Stabilizer

PHYSICAL DESCRIPTION

Appearance	Colourless to Pale Brown, free flowing liquid
Freezing Point	-40°C
Specific Gravity	0.98 – 1.02
Solubility	Water, Methanol
Odour	Alcohol-like
pH	6.8 – 7.8
Activity	80%

PROPERTIES

CFR Chemicals CCS-104 is a specialized water-soluble liquid, highly concentrated clay stabilizer designed to prevent the hydration of formation clays during drilling operations.

CCS-104 can be used as a KCl substitute.

CCS-104 is compatible with KCl solutions and can be used in conjunction as an additive to enhance performance.

BENEFITS

CCS-104 is a reliable and field proven clay stabilizer that is highly concentrated

CCS-104 is winterized to -40°C

Clay Stabilizer

MIXING &
HANDLING
INSTRUCTIONSCAUTION,
SHIPPING & HANDLING

CCS-103 is typically added at rate of 900 ml (0.9 liters) per 1000 Liters (in equivalence to 3% KCl).

Flammable liquid and vapour. Causes skin irritation, Causes serious eye irritation. Toxic if swallowed, in contact with skin, or inhaled. Causes damage to organs.

Handle with care as with any industrial chemical.

Wash contacted area with large quantities of water.

CCS-103 is available in 20 Liter pails, 205 Liter drums and in bulk.

Safety Data Sheets are available outlining safe handling practices.

Disposal should be in accordance with all applicable federal, provincial, and local environmental regulations and laws.

For additional assistance or information, please contact your nearest CFR Chemicals Representative
