#### Section 2 – Hazard Identification

Signal Word Warning

**GHS Pictogram(s)** 

None

**Hazard Statement:** 

H316 Causes mild skin irritation. H320 Causes eye irritation.

**Precautionary Statement** 

Prevention

No Statements.

Response

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact

lenses, if present and easy to do. Continue rinsing.

Storage

No Statements.

Disposal

P501 Dispose of contents/container to an approved waste disposal unit.

GHS Classification None

#### **Section 4 - First Aid Measures**

Inhalation If breathed in, move person into fresh air. If not breathing, give artificial

respiration. Consult a physician.

**Eye Contact** Rinse thoroughly with plenty of water for at least 15 minutes and consult a

**Skin Contact** Wash off with plenty of water. Consult a physician.

Ingestion Never give anything by mouth to an unconscious person. Rinse mouth with water.

Consult a physician.

Most Important Symptoms/Effects both Acute and Delayed

Not expected to present a significant hazard under anticipated conditions of

normal use.

**Note to Physician** No specific antidote. Treatment of exposure should be directed at the control of

the symptoms and the clinical condition of the patient.

## **Section 5 – Fire-Fighting Measures**

Flash Point (°C) Not Flammable

**Flash Point Method PMCC Auto Ignition Temperature** 415°C

**Conditions of Flammability** Not flammable or combustible.

**Extinguishing Media Unsuitable Extinguishing**  Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Media Water jet.

Unusual Fire/

**Explosion Hazard** No data available.

**Hazardous Combustion** 

**Products** Carbon oxides.

Date of Revision: March 15, 2022

**Fire Fighting Equipment** 

Wear appropriate protective equipment and self-contained breathing apparatus with a full face-piece operated in positive pressure mode.

**Special Precautions for** 

Firefighters

Do not enter fire area without proper protective equipment, including

respiratory protection.

#### Section 6 – Accidental Release Measures

Personal precautions Use personal protective equipment. Avoid breathing vapours, mist or gas. Ensure

adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapour

can accumulate in low areas.

**Environmental precautions** Prevent further leakage or spillage if safe to do so. Do not let product enter

drains. Discharge into the environment must be avoided.

Methods and materials for

containment and cleaning up Soak up with inert absorbent material and dispose of as hazardous waste. Keep in

suitable, closed containers for disposal.

#### Section 7 - Handling and Storage

**Precautions for safe handling** 

**Conditions for safe storage** 

Avoid contact with skin and eyes. Avoid inhalation of vapour or mist.

Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

Hygroscopic.

Incompatible Materials

Strong acids, Strong bases, Sources of ignition, Direct sunlight.

Personal protective equipment

**Eye/face protection** Chemical safety glasses with side shields to prevent eye contact. As a general rule

> do not wear contact lenses when handling chemicals. If contact is possible, the following protection should be worn: Splash goggles. Safety eyewear complying with an approved standard should be used when a risk assessment indicates this

is necessary to avoid exposure to liquid splashes, mists, gases, or dusts. If inhalation hazards exist, a full-face respiratory may be required instead.

Skin protection Wear chemical resistant gloves, impermeable protective clothing and safety

shoes. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a

specialist before handling this product.

**Respiratory protection** Use a properly fitted, air-purifying or supplied air respirator complying with an

approved standard if a risk assessment indicates this is necessary.

**General hygiene** 

Considerations Handle in accordance with good industrial hygiene and safety. Eye wash fountains

and safety showers must be easily accessible.

**Specific engineering controls** Use only with adequate ventilation. Use process enclosures, local exhaust

> ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Use explosion-proof

ventilation equipment.

## **Section 13 – Disposal Considerations**

#### **Product**

Do not discharge substance/product into sewer system. Dispose of in accordance with national, regional, and local regulations.

#### **Contaminated packaging**

Date of Revision: March 15, 2022

Dispose of as unused product in a licensed facility. Recommend crushing, puncturing, or other means to prevent unauthorized use of used containers. Do not cut, weld, or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled materials and runoff and contain with soil, waterways, drains, and sewers.

### **Section 14 - Transportation Information**

CANADA Transportation of Dangerous Goods (TDG) **Not Dangerous Goods** 

#### Section 15 - Regulatory Information

DSL (Canadian Domestic Substances List) and CEPA (Canadian Environmental Protection Act)

All components of this product are in compliance with the chemical notification

requirements of the NSN Regulations under CEPA, 1999.

**TSCA Inventory** All components are listed or exempted.

This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations and the SDS contains all the information required by the Hazardous Products Regulations.
